DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-2, 3-4, 7-14, 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Bodnard et al. (7,072,688).

Regarding claims 1-2, 28, Bodnard discloses an enhanced companion digital organizer for cellular phone comprising: an adapter designed to attach to a mobile device, the adapter having one or more electrical contacts to interface with one or more electrical contacts of the mobile device to allow information to be passed between the adapter and the mobile device, when the adapter is attached to the mobile device, the adapter further having a connector portion that is electrically coupled to the one or more electrical contacts of the adapter (see figs.3A-B, elements 10A, 20A and its description);

Art Unit: 2617

and a host device having a connector portion that is a mate to the connector portion of the adapter, wherein the connector portion of the host device has one or more electrical contacts to interface with one or more electrical contacts of the connector portion of the adapter when the adapter and host device are connected using the connector portions of the adapter and host device (see figs.3A-B, element 30A and its description); wherein the adapter is designed to remain continually attached to the mobile device, including when the adapter is not attached to the host device (see fig.1B, and its description).

Regarding claims 3-4, 7-14, the Examiner takes Official notice that these features jack knife connector...etc. is notoriously well known in the art.

Allowable Subject Matter

3. Claims 5-6, and 29-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 15-27 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 15, and 23, although, the prior arts disclose an adapter. However, none of them teach the secularly held by a plurality different types of host devices and as specifically described in claimed.

Claims 16-22, 24-27 are allowed as being dependent on independent claims 15 and 23.
